Education

Indian Institute of Information Technology, Ranchi, India

August 2024 – April 2026

M.Tech (Data Science & AI)

North Eastern Hill University, India

August 2018 – June 2022

B.Tech (Information Technology)

Publications

- **Adversarial Prompt Injection Attacks on LLM: Cryptographic Key Leakage and Defense Strategies**
Under Publication at International Conference on Advanced Computing and Applications (ICACA-2026).
- **IoT-HITS: IoT-based Human Intrusion Detection System for Border Regions using Deep Learning**
[IETE Journal of Research] DOI: <https://doi.org/10.1080/03772063.2025.2521688>
- **Deepfake Video Detection Using Face-Centric Processing and Frame Sampling**
Under Publication International Conference on Advanced Computing and Applications (ICACA-2026).
- **Balanced Few-Shot Episodic Learning for Accurate Retinal Disease Diagnosis**
(arXiv: <https://arxiv.org/abs/2512.04967v1>)
- **Smart City Vehicle Accident Monitoring and Detection System Using MEMS, GSM, GPS Raspberry Pi 4**
[IETE Journal of Research] DOI: <https://doi.org/10.1080/03772063.2022.2043787>

Experience

Research Data Scientist Pantech e-learning, India

February 2023 – August 2024

- Designed and deployed predictive machine learning models with emphasis on robustness and reliability under noisy and incomplete real-world data.
- Conducted systematic robustness evaluation using stress testing and distributional shift analysis to identify failure modes and inform mitigation strategies.
- Improved model stability and generalization through feature refinement and validation-driven model selection.

Machine Learning Intern (C-DAC), India

August 2022 – February 2023

- Performed large-scale data preprocessing and feature engineering on student activity logs (attendance, assignments, quizzes) to support predictive modeling.
- Implemented and benchmarked multiple machine learning models, including Decision Trees, Random Forests, and Support Vector Machines, for academic performance prediction.

Projects

Master's Thesis (Ongoing) : A Transformer-Based Multilingual Framework for Text Summarization in Indian Languages:

- Investigated transformer-based approaches for multilingual text summarization in low-resource Indian languages.
- Experimented with pretrained multilingual models, including mT5, mBART-50, and IndicBART, to build scalable and reliable summarization systems.

Bachelor's Thesis: IoT-HITS: IoT-based Human Intrusion Detection System for Border Regions Using Deep Learning:

- Developed an IoT-based border security system using deep learning for real-time human intrusion detection.
- Designed the system architecture, integrated sensors, and implemented the deep learning detection model with alert mechanisms.

Text Classification Using TF-IDF Feature Extraction in NLP:

- Developed a text classification model leveraging TF-IDF vectorization for feature extraction, achieving high accuracy in document categorization.
- Implemented preprocessing steps including tokenization, stopwords removal, stemming/lemmatization, and text normalization to improve model performance.

Technical Skills

- **Machine Learning & NLP:** Deep Learning, Transformer Models, Representation Learning, Text Summarization, Feature Engineering.
- **Tools & Frameworks:** PyTorch, Hugging Face Transformers, Scikit-learn, NumPy, Pandas.
- **Programming:** Python, C++, SQL, Bash.
- **Research Platforms:** Linux, Git, Jupyter Notebook.

Achievement

- Received the Institution of Electronics and Telecommunication Engineers (IETE) Scholarship for academic excellence during M.Tech studies in Computer Science and Engineering.
- Best Paper Award, ICACA 2026 for the paper *“Adversarial Prompt Injection Attacks on Large Language Models: Cryptographic Key Leakage and Defense Strategies”*.

Professional Affiliations

- The Institution of Electronics and Telecommunication Engineers (IETE) – Associate Member [AM-503427]
